

To Permit Hunters in Hunt # 2523
(North River C):

July 14,2009

You have drawn a permit for this hunt. This hunt is designed to reduce elk damage in the Grayland area. Due to an error in the 2009 pamphlet this hunt was not designated as a "Hunt Master" hunt. However, after consulting with the Wildlife Officer responsible for this area (Officer Mark James) we have decided to treat this hunt like a "Hunt Master" hunt just like it was intended and has been done in past years.

What this means to you is that Officer James will contact you sometime no later than November to inform you about the hunt including designating the specific area to be hunted. Officer James works with a local resident who keeps track of when elk show up in the damage prone areas.

Again, you will be contacted by Officer James with enough lead-time to allow you to plan your hunt. If you wish to talk to Officer James directly he can be contacted on his cell phone: 360-581-1304.

Good luck

H.Max Zahn
